SUMMARY

Frontend Web Developer experienced in building responsive web applications using Vue.js, Nuxt.js, React.js, Next.js, JavaScript, HTML, CSS, Sass, and Tailwind CSS. Skilled in translating Figma designs into pixel-perfect interfaces, integrating APIs, and maintaining production applications across multiple projects. Experienced in using ChatGPT and Codex for AI-assisted coding, debugging, refactoring, and improving development speed and code quality, with a focus on scalable, maintainable frontend solutions.

EXPERIENCE

SEO egypt July 2020 - Present, Egypt, Cairo

- Develop and maintain **15+ production projects**, delivering **200+ pages** and **500+ components** using Next.js, React, Vue.js, Nuxt.js, and TypeScript.
- Build responsive, multilingual applications across **6 languages (AR, EN, IT, ES, FR, DE)**, integrating CMS/backend APIs and optimizing Lighthouse performance.
- Manage up to **3 concurrent projects**, collaborating with SEO, design, and backend teams to improve technical SEO, performance, UX, and production stability.

Pencils November 2025 - May 2026, Freelance

- Independently developed **100% of the frontend**, delivering **10+ responsive pages** and **20+ reusable React.js components** from Figma designs.
- Built and tested responsive interfaces across **4 device categories: mobile, tablet, laptop, and desktop**, ensuring consistent UI behavior.
- Used ChatGPT and Codex throughout development for implementation, debugging, refactoring, and refinement of the React.js application.

Aswaq July 2022 - November 2022, Freelance

- Collaborated with the development team to implement and resolve **10+ frontend features and production issues** across the application.
- Enhanced the discount system supporting **2 discount methods: fixed-amount and percentage-based discounts**, including related frontend logic.
- Delivered responsive UI improvements across **5+ pages** and **10+ components**, maintaining compatibility with existing application workflows.

Nitros June 2021 - August 2021, Freelance

- Independently managed frontend development and resolved **7+ production UI and functionality issues** across the application.
- Fixed shipping calculation errors to ensure **accurate order totals** and consistent data handling between frontend and backend.
- Implemented and maintained **100% of the payment UI flow**, covering all frontend payment steps and related user interactions.

PROJECT

Hyundai jordan

SEO egypt • hyundaijordan.com/en • October 2024 - Present

- Developed and maintained **30+ responsive pages** and **100+ reusable UI components** for a bilingual **Arabic/English** automotive website.
- Modernized the frontend by migrating **5 legacy jQuery components** to JavaScript/Vue.js and maintaining JSON-driven application content.
- Tested and optimized frontend performance and responsive behavior across **mobile, tablet, laptop, and desktop** environments.

intwit.ch

SEO egypt • intwit.ch/en • April 2026 - Present

- Independently develop and maintain **70+ routes** and **80+ frontend features/components** for a production Next.js real-estate platform.
- Build and test responsive interfaces from **400px-1920px** across **4 locales (EN, FR, DE, IT)** using React, TypeScript, and Tailwind CSS.
- Implement Figma designs, API integrations, forms, and property workflows while optimizing **Lighthouse performance, technical SEO, and UX**.

deepmarks

Pencils • deepmarks.vercel.app/name-branding • November 2025 - May 2026

- Independently delivered **100% of the frontend**, building **20+ pages** and **20+ reusable React.js components** from Figma designs.
- Developed and tested **40+ responsive page/component interfaces** across mobile, tablet, laptop, and desktop screen sizes.
- Completed frontend development, debugging, and performance testing across **4 device categories** using React.js, ChatGPT, and Codex.

Payit

SEO egypt • letsgo.payit.ae/en/letsgocard • October 2022 - January 2023

- Independently developed **2 production Nuxt 2 pages** from Figma designs for the existing Letsgo Payit website.
- Built reusable section and card components with responsive interfaces across **4 device categories: mobile, tablet, laptop, and desktop**.
- Delivered **Arabic and English (2 locales)** interfaces and optimized frontend performance, images, and responsive behavior.

EDUCATION

Bachelor's degree, Veterinary Medicine

University of Assiut, Egypt • Egypt, Assiut • 2017

CERTIFICATIONS

Theoretical and practical understanding of JavaScript

Sololearn (Online) <https://www.sololearn.com/Certificate/CT-X5DLCJTQ/png> • 2021

Web Development Challenger

UDACITY (Online) <https://www.udacity.com/certificate/TL2YSYC5> • 2021

Front End Web Development Professional

UDACITY (Online) <https://www.udacity.com/certificate/N4LJZPJV> • 2021

JavaScript (Basic)

Hackerrank (Online) <https://www.hackerrank.com/certificates/325314a723ac> • 2021

Theoretical understanding of HTML

Sololearn (Online) <https://www.sololearn.com/Certificate/CT-XOH0NOSI/jpg> • 2019

Theoretical understanding of CSS

Sololearn (Online) <https://www.sololearn.com/Certificate/CT-6CUPE4YT/jpg> • 2019
